

## Long-term expansion

The name also gives you room to grow into specialized modules while keeping a consistent identity.

Examples:

- **FarmTrack Jamaica – Farmer Portal**
- **FarmTrack Jamaica – Extension Portal**
- **FarmTrack Jamaica – Bamboo Intelligence**
- **FarmTrack Jamaica – Weather Intelligence**
- **FarmTrack Jamaica – Carbon Registry**
- **FarmTrack Jamaica – Market Intelligence**
- **FarmTrack Jamaica – Traceability**
- **FarmTrack Jamaica – Executive Dashboard**

This creates a unified ecosystem under a single recognizable brand.

## One suggestion

If you decide to adopt **FarmTrack Jamaica™** publicly, I recommend taking a few practical steps before the Board presentation:

- Check trademark availability in Jamaica.
- Secure the most appropriate domain name (for example, farmtrackjamaica.org or a similar variation if available).
- Design a professional logo and visual identity.
- Prepare a one-page brand guide so future presentations, documents, and the application itself all use consistent branding.

With those elements in place, **FarmTrack Jamaica™** would present itself not just as software, but as a credible national platform that the BIAJ could confidently champion.
